The placed master stood serenely o'er its pet squarton, watching its still life so calm and void of strife.

The bushand's hobby often is a love, liven to a loving wife).

dost then a footman entered with a note, And turning quickly, the acquarion fet. An use! how shall I sell How the fierce nister the poor culpricinght, And how he polled the bell.

At d called the man and malds, and banged the door, Fretted and fumed in passionate regret, And how his leet got wel, And how the landsome carpet on the floor Was subsed by his pet?

Meanwhil the w.fe, screen and calmand attil. Silentling in her chair. "My dear," she said, "Where is your patience fied? You should control yourself. There is no ill Worth fretting for. 16 as I do, lostead." No answer then. The wreck was all removed. Then came thus frank confession: "Lucy, dear, I have been wrong, I fear; My poor itr-parience is indeed reproved."

Then she drew kindly near And whispered somelling what, I can not tell; But ever since, the wife's small troubles find A sympathetic mind.

A FASCINATING GHOST.

ANTED. A young gentleman who knows how to spell, and who writes a good hand, to opyling in the country for two or three months, it remain in employer's house. Address in own hand, slating what salary is expected, X, Box 1400,

This was an advertisement I cut out of the Evening Post one spring afternoon. In the old days I had been book-keeper for the late concern of Skintlint, Starvehimont & Co., and while with them I had been getting a good salary, and, to my sorrow be it said, lived pretty well up to it; so as I made nothing by the failure of the concern, and lost my iduce as well, I had to come down very low. I had saved a little, more by good luck than from forethought, and this little, used with the strictest economy, and added to by a few dollars made here and there in cold ways, was all that had kept me ulive for eighteen months. However, I didn't feel quite disposed to go to the dogs yet, for there was always a chance of something turning up in a great city

like New York. As I looked around my room that evening I realized how hare it was of either furniture or adornments; how unlike-. Ah, well, there was my paper; and I unfolded it with all the glee of a child over a new story-book. There was, of course, the usual political news, the usual number of railroad accidents and criminal proceedings; there were items of interest to investors and theater goers and travelers; but nothing forme. I had no money to invest, or for theaters, or traveling. So I skipped all that and went on to the advertisements, and the only one of them all worth reading twice was the advertisement quoted above.

I read it two or three times, and then decided it was worth trying. So I hunted up a sheet of paper and addressed Xas follows:

"My Dear Mr., Mrs. or Miss X.: I notice As to satary, I don't know what to say-don't wish to value my services at more than they're worth. Should you mean by 'remain in em-ployer's house,' I would be bearded and todged at your expense, my price—that is, asking price—is five dotlars a week. "Yours respectfully

"JAMES W. WOLCOTT." The next afternoon I heard from my friend X., who proved to be a man. His letter ran thus:

"JAMES W. WOLCOTT, ESQ.: "My dear Sur-You may be a gentleman, write a good hand, and know how to spell, but you're a foot. I include sixty-three cents, the fare to —— You will take the 7 a. m. train tomerrow morning from Grand Central Depol and when you arrive at ---, ask for my carriage, as it will be there to meet you.

"Seal Humpheys," Sol. Humphreys!-the last man in the world I would voluntarily have written to, and for employment, too! Two years before I had a very nice little direction might have been an understanding, if not an engagement. But as it was I put away all thoughts of love and lovemaking and dropped pretty Mabel very suddenly, without any kind of an understanding, and I had not seen her since, And now to think I had fairly got myself into it again! But, I reflected, I might not see much of Mabel, after all. So much the better. Bread and butter was a necessity and I must go and make the

beat of it. The next morning I caught the train, but missed my breakfast, and by the time I reached the house I was decidedly

Mr. Humphreys met me at the door, and I was pleased to see he did not seem to remember me at all. He put up his eyeglasses, and inspected me from head to foot. "So you're James W. Wolcott, are

ou, young man?"
I told him he was not mistaken. I

always had that name-born with it, I "And you think you're a gentleman?" I begged his pardon—didn't thin't anything about it; it was a self-evident

The old fellow grinned, "Snppose you come in and have some breakfast. You haven't had any, I suppose?" I said I had not. "Well, come in and have some."

After breakfast Mr. Humphreys led the way into the library and motioned me to take a chair, while he explained what my work was to be. He had been -he was an euthusiastic botanist-and wanted it copied for the press. The work of re-writing the wholo thing legi-bly was more than he wished to undertake, so he had advertised for an amann-

After this had been explained to me, Mr. Humphreys started up. "Get your hat, Mr. Wolcott. I want to show you

All through the house and all over the place he took me, and when he got to the farther extremity of the grounds he paused, and pointing to a linge stone house beyond, said: "I'm trying to bny that house; I'm very anxions to get it, but my daughter objects."

I asked him why she objected.

"Well, you see, it hasn't been occupied lately, and she says it's gloomy; says it's haunted, and she wouldn't like to live in it."

"Miss Humphreys can't really believe that to be true," I answered. "I don't know whether she does or not. She's away now, but she'll be home to-morrow, and perhaps she'll be more reasonable."

The next day Mabel arrived. She met

that particular kind of candy. firm friends; but Butter-Scotch I ful character. loathed. I really don't know why I loathed him so much, unless because there was a rumor adoat that Mabel was making up her mind to renounce the langs and bangles of single life, and herceforth stick to Butter-Scolch. Of course, this, of itself, was enough to make me contemplate placing an extraordinarily bent jin on his chair, or converting his overcoat pocket into a reposit my for a litter of baby kittens. But ndependently of this rumor, I had a distinct and positive impression that I loathed the man just us he was, whether he ever succeeded in marrying Mabel or not. Of course, it was none of my business, but it did seem a pity to stand by and see her become the missing rib, thereby completing the anatomy, of such a molly coddle

One morning I was standing on the iazza just finishing a very nice cigar Mr. Humphreys had presented me with the day before, with the remark that he didn't mind a man snoking once in a atominated cabbage—when Mabel came

"Mr. Wolcott," she said, "are you going to be busy for a few minutes? think not," I replied. "Mr. Humphreys doesn't want to begin for half an hour yet." "Then will you come to the crequet

ground and linish your eigar there? "Certainly," I answered; "with Over to the croquet ground we strolled. and Mabel sit down on one of the rustic sucts. Without preamble of any

kind, she began; "I know you have a friendly techng for us all, Mr. Wolcett, and I want to ask your epinion and advice " I towed, for she was unquestionably right about my friendly facture, but I wondered what was coming.

She went on: "What do you think of Mr. Steele ?" Well, that was a poser ' What did I wonr advertisement in to-day's issue of the Evening Post. My handwriting you can see for yourself. My spelling, I think, is usually correct, and there is no doubt I am a gentleman. Well, that was a poser 'What did I think of Butter Scotch? That he was a yourself, but I reflected it wouldn't do to tell her so, particularly if think of Butter Scotch? That he was a

she was going to - Oh, no! it wouldn't do et all. Why do you ask, Miss Humpl reys? "I will tell you frankly. There is a

very strong inclination on papa's part to buy the stone house," "Yes, I know there is." "And I don't want him to."

"May I ask why not?" "Because it's haunted," "I don't see how that affects Mr. Steele-he isn't hannted." Mabel laughed. "I don't suppose he But that isn't what I mean, I want to know if he is conrageous chough to go there and see if it is really hunnted. "Oh, I guess he's pretty brave; he says he is, and Mr. Humphreys thinks

so too, I believe." "Yes, papa is so cut! usiastic over Mr. But I mean Mr. Steele's kind heart and religions feeling; le thinks he must with pretty Mabel Humphreys, and it be a good man, and not easily fright-had gone so far that if the crash in my pened," She looked at mes parely, "And affairs had not occurred, I believe there \ I want to know if he's a man fully to be trusted -

"With untold wealth?" "No; to see a ghist."

"Ah! I see!" "You're brave, too, aren't you, Mr. Wolcott?"

"You're very kind to say so, but I assure you there never was a worse coward than I am. I've no conrage at all -I'm all brain! Now there's the difference between Mr. Steele an 1 myself."

Mabel rese. "Yes, I see the difference," she said. "I'm very much obliged to you, Mr. Wolcott, for your good advice. I wasn't sure whether he would so is courage; I prefer a happy mixture. And with a pleasant little nod she sailed | hot for him | Good-bye, mortal."

I never saw until afterward what a comparison I had made—one all comage and no brain, and the other all brain and no courage. I had muddled things badly, that was evident, and the worst of it was that she never gave me an apportunity to let her know I had not intended mny disrespect to her future

All this time Sol. Humphreys never ceased talking about buying the stone house. At last Mabel made the proposition that some night we three, Ned Butter-Scotch and myself, should go there and stay until morning, and if our report was "no ghests," she would not say any more against the purchasing scheme; but if anything diabolical or mysterions happened, that her father was to give up the idea. Our consent writing a history, or text book of ferus being asked we cheerfully gave it, and as one time was as good as another, we decided to make the experiment that

dwelling about 9 o'clock, and were admitted by the man in charge, whose headquarters were in an adjoining build-ing, which communicated with the house by a long entry, at the end of which was an iron door. This door was closed and bolted after us, and we were left to make our explorations in our own

I, for one, did not expect to see anvthing supernatural, but Mabel's stories were very vivid, and I would have liked to oblige her by seeing something uneanny. We had brought a lantern with ns, and Butter-Scotch had very selfsacrificingly taken charge of it. So we ascended the stairs, and made a tour of the upper floor, then descended, and made another tour of the ground floor and cellar, and Butter-Scotch considered the exploration so thorough that he strongly advocated going home and to bed, and bringing in a sealed verdiet, little ghostly courtesy. "Mortal, I never "No ghost." But we wouldn't hear of

it. So, having made sure that the front

tion gracefully, and acted as if she had could be opened instantaneously if the

Ten o'clock-no ghost. Eleven-not "Oh, no; I was thinking how-"

Suddenly there was a crash somewhere n the house "By George!" gasped Ned, "we're in for it, boys, and don't you forget it!" I don't know how long we waited, but in, the intimacy that formerly existed a hissing sound, then a pail rolling down between Mabel Humphreys and Jimes stairs, followed by an assortment of W. Wolcott; he was one man and I was dust-paus and fire-irons.

another. And so the days went on, and This was tirst-class. After the storm Toward the end of July Ned Humph- the verdict to "ghosts emphatically," In a few minutes there was another crash, and we saw something white on

Seotch, on account of his fondness for the stairs, slowly and selemuly approach ing. As it neared the bottom, it raised Ned was quite a boy, and a capital fellow at that, and he and I soon became a rasping sound of a by no means cheer-Butter-Scotch made for the door, and in his excitement pushed against it in-

stend of pulling, so he comblu't get out, The ghost, seeing our fright, uttered a shrick, and came swiftly toward us. This was too much for flesti and blood to bear, and Butter-Scotch yelled, "Murder! thieves! fire!" frantic with norror, and we all three pulled and pushed, beside ourselves with fear. Just us the ghost had nearly reached

ns, Ned pulled the door open, and there was a crush and a rush, and before I knew what had happened the door was shnt to with a bang, and I was left in darkness in the hall, with the knowledge that the beastly ghost was where second of silence, and then a voice nissed, "Cowards!" I indorsed that pinion heartily, but the others were or slan the door on them. There was a vawn, and then the thing

I placked up my spirits a little. The thost had sense enough to be sleepy und I thought I could stund a little talk, f it would only keep hands off. Possily it wanted to find the door, for it same straight toward me. But the knob wasn't where the phantom thought it night to be, and the seeking hand rested or about two seconds on my nose. The ouch gave me conrage; it was warm, soft and pleasant as a woman's. stretched out my arms and grasped the phantom. It shrieked and started, but was strong, and the ghost was solid, so didn't get away. I didn't feel afraid of it then; on the contrary, it seemed

afraid of me. "Hear ghost, sweet ghost," Isaid, "I on't hurt von.' unwer came tramblingly and w: "What are you saying? sent von ?"

"Why, my darling ghost," I sai l, "the lady that's going to be Mrs. Butter-

Scoteli. "How do you know she is?" "Oh, I know well enough. You must be a smart ghost not to know that."

"She doesn't love him." "Oh, yes she does. My sweet little phanton, you're entirely mistaken. Come, I'll see if I can't light the lantern, it that insane booby hasn't smashed it

all to pieces in getting ent." "Let me go, please," the ghost begged, in a very polite manner, and as it spoke the words sounded to me very much as from a human voice disguised, and yet I couldn't see for the life of me how anything human could have got into the house after we came in, or how anything luman could have made such an everlasting row, and rettled its bones so uncasantly. But the ghost's hands had tlesh on them. My curiosity was aroused, so I said: "No, I cannot let

TON go. "It's wrong, hugging me, when you love another. "Whom do Hove?" "Mrs. Butter-Scotch, of course.

know all alemt it." "You do, eh? Then I suppose you know how it happened?"
"Yes, of course I do." "Do you know why I stopped?" "Because von hadn't money enough

o ask her to marry you. "You're perfectly right, my dear lite ghost, but neither you nor I know whether she'd have married me even if I had happened to have plenty of money. I wish you'd tell me that,' "I won't do anything of the kind,

I'm perfectly suprised at myself for talking to a mortil so long. Good-bye, man. Go back to the Humphreys and and rtake it. Brain is a good thing, tell them what you have seen. If the old man buys this house won't I make it But I wouldn't let go of the ghost's

> "Please let me go now," the phantom A bright idea came to me. I said: "Can I trust you? Is a ghost's word good for anything?"

With great dignity it answered: Yes; I never lie. "All right. If you'll promise to meet me to-morrow evening under the old apple tree on Mr. Humphrey's place at 10 o'clock, I'll let you go," And as I released my hold the ghost seemed to vanish away, and I opened the door and went out. My senses were dazed in the open air; the evening had been so strange, so almost suspicious, that I could not fathom it all at once. Besides, I had allowed the ghost to go before it had given the promise to meet me again. I remembered my stupidity with regret, but somehow I felt the ghost would consider the promises as having been night.

Armed each with a stout stick and pillow, we advanced upon the haunted lost, and were discussing all manner of are becoming more and more puzzled plans for my rescue, and Ned was on the over the definition of malaria and the there were selected from the Ten three proaching as if from the adjoining place, and it came straight to me and stopped

Razar.

Healthy Women. A writer, in urging the necessity for more attention to physical culture, notes as a favorable sign the fact that the pale and interesting type of female beauty is fast losing its popularity, and that men ot position and influence are declaring for the healthy standard of woman! beauty, such as was ever recognized by Greece and Rome,

This is certainly an important and happy change in jurblic taste, and already the effects of it are to be detected in an improved condition of feminine health, for it will hardly be denied that on an average the women of to-day are physically superior to what they were a few years ago, when tight government in Bussia there is no career lacing and similar destroying enstoms prevailed.

Young women take more exercise than erty is interfered with to a most dangerthey formerly did. They ride and walk more, aml are more in the open nir. They have not the insme dread of the sun's rays which they once had. But there is much room for improvement yet. Many homes are still presided over by invalid wives and mothers, who furnish a constant spectacle of sudness and misery to their families and friends, and are a subject of unlimited expense to their husbands. In such homes the greatest blessing that could be wished for would be the health of the mistress restored, but too often it is the one blessing which never comes.

American homes, more than any others. perhaps, in the world, are saddened by sickly women. If this shall be so no longer, it will be a great blessing to the nation. And the remedy is simple, American men are us healthy as men of other nations; there is no good reason why American women should not be. All that is needed is proper attention to dress and exercise. Let women dress, as men do, so that their bodies shall not be squeezed and pressed together, but have free room for motion, and let them go out into the air and sinshine as men do, and exercise their bodies, and the race of American women will not become extinet, as it is Government has to do is to throw overthreatened to do. On the contrary, it will be improved, built up, and beautified, and the time will shortly come when the healthy man will not have to hunt the country over for n healthy wife. We are on the right track now; all that is needed is to go ahead - and the result will be manifest. Women will die to be in fashion; therefore, let the fashion of female beauty be vigor and strength, and all the ladies in the land will be swinging dumb bells, practicing archery, riding on horseback, and walk-

style. - Boston Traveller. The Malaria Puzzle, point of coming for me alone, as Mr. results of its effects on public healtin. VOL. XVI.--NO, 51.

The Coffee Traffic.

The consumption of coffee in the United States has reached the enormous quantity of about 6,000,000 sacks annually. While England, France, Germany and the Latin Kingdoms that border the Mediterranean sea import thousands of the president old citizen, decisively: "you don't catch sands of tons of the precions beau, its classes of our own rapublic. The English and the Russian people consume more ten than coffee, while this latter tragrant herb is sold as medicine in the drug shops of Spain and Italy and in numerous Latin American republics.

classes obtain but starvation wages; long the coast of the Baltic sea, in Finand in the east, and Denmark, Sveden and Norway in the west, wine, effect and tea are beyond the reach of the toilug poor. These people have invented arious table beverages, such as decoc ions of birch bark, ales of various kinds, etc., but none of these liquors can compare with the tea and coffee drank by

their richer neighbors. In our own favored Bepublic the tariff wages is much higher than in any ether part of the world, and our lubor ing classes daily see on their tables food that but seldom visits the lumble forror, I just laid down on the ground, boards of their transatlantic consins, By consequence the Tragrant extruct of the "Arabian berry" is seen on almost every table throughout the wide area of taken a fumlde, too," suggested the auther epublic, and the American people have enrued, and they deserve the reputation of a nation of coffee drinkers.

As coffee has become such a necessity to us, and as our population is increasing so rapidly that the statesmen of from whence are we to draw our future supplies of coffee.

The question is readily answered. panied by the sheriff, rushed in and col- The vast plains of Cordova, the semi- pile plant. A flarrowing Tale. A well-known young society bean, while traveling on an Indiana Railroad part of this judgment, and got himself into a nice little scrape. When he entored the ear at New Alleany, he found it nearly full, and he instantty made for a seat nearly in the middle of the car, which was vacant. The seat in front of him was occupied by a lady and a little girl, while just behind sat a young lady. who seemed to be alone. The lady and little girl got off at a small station ulcont half way to Indianapolis. Inst us the train was starting from the station, the voung man noticed a bundle of female elothing lying on the seat at his side. The idea instantly occurred to him that miles of Indianapolis, when the young lady on the seat behind him began to show signs of restlessness. She looked under the seat she was occupying, on the seat behind her, and then on the seat en which the young man was sitting. This search did not seem to satisfy her, and in a few moments she began to make inquiries of him-if he had seen a smull bundle on any one of the seats. The oung man's hair began gradually to stand on the end, and for a few moments he was speechless as he began to realize what had become of the bundle. He did not dare to tell her what he had done. s he replied that he had seen nothing of it. This increased the young lady's nueasiness, and she made inquiries of the conductor, but he had not seen it. hire a carrriage for the young lady, and saws atter gumming. was very attentive to see that none of her bundles were lost, and that she went

to the right hotel. JAM'S GORDON BENNETT, when at Neupo t, patronizes local trade-men as much as possible. He is now spoken of as a very mea suming, pleasure-pulle, youngish-looking man, whose only occupation is to kill time. In everything he does he shows most extraordinary consideration for the pleasure and profit of others. There are lots of worse fellows than Gordon Bennett, notwithstanding all the wild extravagancies of his early

"Do you think you are going to die?"

quired the Coroner of the dyer who ad fell into a vat of boiling indigo. "I eel very blue," responded he feebly, 'end I think I'll dye no more." However he is still o-live and the Coroner's evidence was not red. A sutcher's bey earry his shoulders pecident

ngainst a lady's head and nearly knocked tier but ell. "The deuce take the tray," eried the lady in a passion. 'Madom," said the boy, gravely, "the dence can't take the tray. A DETROIT sa'eswoman, on being

asked what was the hardest work she had to do, replied: "Standing on my feet and keeping my temper." She says but men are much better customers to wit upon than women-for the men alwars know before they go into the store what they want to huy, whereas the vomes, God bless 'em, want to see half the stew displayed to them before they make up their minds to buy ten cents' verth of ribbon.

A FEMALE boarder at one of the Long Brunch hotels, who had made herself very disagreeable by her ill-natured remarks about some of the lady guests, met her match in a Boston woman, who, the presence of a large company, holdly snid: "Excuse me, madam; is that hair all your own?" "Whose do you suppose it is?" was the answer. "Paron me," returned the other, glancing at the offender's husband, a little, baldheaded man, "I thought it might be Mr. C.'s." - Brooklyn Eagle.

IF you like a nice hot pie that will come on the table smoking, make it of uraeuse Sunday Times. And von will chews another. - D. troit Free Press.

Substitutes for Lumber in Bulldlog. As an indication of the further inroads hat other material than lumber is liketo make in building operations, an exchange says that, in view of the many destructive tires among domestic dwellings, we wonder that the use of light con joists and fire-proof floors is not more extensive than at present. Half the danger and destruction resulting from tire in some domestic dwellings would be avoided by the use of such floors. It is generally the case that fires are first discovered when localized by a single room, and it is only the rapid destruction of the whole of the interior of a dwelling house that causes the serious loss which we at present take as a matter of course. We think that in a few years to come the entire destruction of a dwelling because one room has inglit fire will be thought as outrageous is the distruction of a whole row of ouses from a conflagration in one would be thought at present. A fire may very a ilv be starved out by want of comloistille material, a great deal easier than it can be extinguished by water when wood or other combustible material has once caught. In the localization of a tire in the room in which it occurred would lie the best protection to life and property against fire. It is not es if such protect ve means need require expressive outliy. A floor of iron justs and non-inflammable material can be laid, we believe, almost as cheap as he present wooden floors. To complete he i-olation of each room, the doors may be made, at no increase of present east, of wood so impregnated with chemicals that it is no longer inflammable. These improvements will surely come in time; like all others, they may be foretold long before the public eventually receives the benefit of them .- Northwestern Lumberman.

Stuffing Her Dog. Mrs. Carlyle had a little pet lap-dog, named Nero, of which she was very tond. Carlyle used to take Nero out with him for a run every night when he the lady who had just gotten out had forgotten the bundle. He thrust his head out of the window and called to how carefully he looked after his little her, but she was just entering the station and did not hear him. The train (not exactly with his lips, but with a had just started, and the young man | small pocket-whistle,) least he should thought that the hundle would be lost if run astray or otherwise come to grief. he did not act quickly, so he picked it This little dog at last grew old and asthup and threw it out of the window on matic, until it was a misery to look at the platform. He then sank back on his sufferings; until, in short, like many his seat with an easy conscience, flatter- another little pet, he had to be kindly ing himself that he had acted with won- and painlessly put out of his little derful presence of mind. Things went troubles. This was a great grief to Mrs. along very smoothly until within a few Carlyle, who never could quite reconcile herself to the clear necessity. was telling her grief to a lady friend, who, I believe, had not been very long married, when her friend, trying to say something to comfort her, suggested Why not have him stuffed?" 'Stuffed !" said Mrs. Carlyle, with a flash of indignation, "would you stuff your balty?" She was also very tenderhearted with her pets, and especially with her servants, whom she fried in every way to attach to her, sometimes, but not always, with perfect success. London Quarterly Review.

A NEW file should always be used with a light pressure until the very thin sharp edges are worn off, after which a heavier pressure may be used with much " replied the young lady in un an- Every filer should keep a partially-worn last, looks down to make sure that it did enly night-gown." The young man attempted to make some amends when where borax or similar fluxes have been they reached the city, by agreeing to employed, or on the glazed surface of

BRICKLAYERS make use of spirits of turpentine, and also of vinegar, for the purpose of removing mortar stains from pressed brick fronts, the materials being carefully applied with a sponge or rag. Any acid applied in the above manner, in very dilute form, would answer the purpose. Vinegur being a very dilute ascetic acid is probably as good a recipe

as can be given. Bob Ingersoll wouldn't have been flung out of the Capitol building if he had been elected to Congress, as Bradlaugh was ont of the House of Commons. None of our members are obliged to believe in God. If they happen to it is simply a strenk of luck.—Free Press.

Good Farming. - It is one sign of a good farmer if he prizes manure. It does not require a good farmer to raise bountiful crops on a farm ulready milly may make money from his farm while he is wasteful of ferti i.ers, but he is not a good farmer, for he is constantly running his land into debt. Good farming consists of such management as will make the form produce the best possible reanlts without deteriorating the soil. This Agents ASSISTATION DE COUCHTY IN the making and use of manning mid a systematic rotation of crops that will be the least exhaustive to the

Where steep a lept for the double purpose of direct income in wool, muton, etc., and the manure they make, it is import out that the extra feed, or tint miside of what the pasture furnishes, should be chosen with care. It would be wise for the American farmer to become bett ir aequainte l with cotton-seed cake, lin-end oil cake, and like egacentrated foods. By feeding, and feeding liberally of such foods, the sheep not only grow rapelly, but the manure they noke is rich introgenous matters and va'unble fortinging salts. The growth f animals is a means to an end, and flock and the land enriched, the most sheep as fertilizers depends largely upon

the kind of food that is used. Picking Figure. The following suggestions in regard to picking fruit for canning are farnished by a gentleman conversant with the business: "It pays in pick your fruit carefully and in time : if in right condition one day the next will be too late to rick. Go over your trees many times. Don't try to pick all al once. If green, you lese weight. If too ripe, it is spoiled for eanning. The proper condition for aprient, plum, peach and nectarine is when fully matured. tut before softening. Use shallow boxes, Shakes make good boxes and are cheap. Above all, bring to the earnery, or rend to the m rket, at the earliest possible moment after picking. It is not too late to thin out some fruit. Trees that overhear do not vield marketable fruit."

owner of which told es that before the he occupied .- Atlantic City Cor. of fowls were confined in it, the trees made | the Washington Republican. it loor no growth, and only a corresponding amount of fruit was obtained. But what a change was evident now The gra's was kept down, the weeds k ll d, and trees presented an appearance of thrift, which the most enthusias ti · l'orticulturist could not but admire and curv. The growth of the trees was most vigorens, and the foliage remarkab'y inxuriant the fruit was abundant, of large size, and free from worms and et er imperfections. The excellence was accounted for by the proprietor, who remarked that the "heus ate all the worms and curculio in their reach. even the eanker worm." He found less ptied by four. trouble with their roosing in trees than ne expreted, and that a picket fence six feet high kept them within bounds. His orchard was divided into three sections,

and the fowls were changed from one to another, as the condition of the fowls or the crehard sections seemed to require. Ensurage.—The publication of a multitude of affidavits from amateur farmers who were "wild" over the results obtained from feeding ensilage seems largely over, and now and then a ray of real truth begins to make its real worth more clear, and in many of the statements the economy was evidently forced, so that suspicion is east over the fective remedy that we know of is the formed would be a strong proof of the Kentucky has produced a mule with eight legs. If the Irish skirmishers want to ship something more terrible than an infernal machine to England, let them buy that critter before

Health and Science.

A good many years ago an epidemic of disease was supposed to be a "visitation," or a "judgment," and prayers vere offered up that its progress might be stayed. Now-a-days, when individuals or neighborhoods are attacked with typhus fever, diplitheria, or my one of he long range of malarial disorders. there is an immediate inquiry as to the condition of that house, or that neighborhood, and the disease is traced to its source of rotten vegetation, putrid filth. oul air, bad drainage, or some other of the nucleanly causes of zymotic dis- a tongue, soft and yielding. For this advance we have to thank

physiological and sanitary science, but a part of many successful industries .-- it will not help us much to know a thing unless we not upon our knowledge. It will not get rid of the causes of disease to know what those causes are, inless | The star-fish is believed to commit whether these conditions are found in ten- | In detail. vinegar, four teaspoonfuls of pure of the country, the result is the sameit is sickness and death. It is not entirely a gratifying thing to

lazy, irresponsible people to find that health, and the best conditions for living useful and reasonably happy lives, are within their own power, and that they are responsible for their fulfillment. It is so much easier to keep on in the old way, to pile up refuse, to let the dramage go, to build a house like a soap ox, and transfer the consequences the shoulders of Providence or the Al nighty. But it is too late to do this now. Providence has been made responsible for the results of our shortcomings long enough, science has discovered that they are within our control, and that it is our business first to discover what the laws are that govern health and disease, and then adapt ourselves and our circumstances to the obligations they

There is no occasion, in the nature of things, for persons to be born diseased. or die prematurely. A pure and temperate life, in a heulthy location, and umid healthy surroundings, are fair guarantees for a green old uge. - Demo- several times to lead him in, by bodily

Interviewing a Muchine.

A dealer in hardware on .tefferson on the walk in front of his store for some days past to enten the public eye, and vesterday foreneon two boys discovered it work, one at the wheel and the other feeding all the old papers he could find, when along came this e Canada Indians with somtling 'ess than a thousand buskets hitched to them. They were evidently father, mother and son, and when they saw the straw-cutter at work they came to a dead halt and exhibited great enriesity to know how the old hing chewed up papers in that manner. After some conversation between them the Indian put down his basket and made a closer inspection. The boys fell back to give him a fair show, and as he picked up a long strip of paper the squaw began turning the wheel in about

slice thin torrators and orions (five po The machinery worked beautifully, tatees to one small out ms); tak chall no and a grin of quiet delight hiel just commenced to spread over the red man's face when the end of the paper was reached the bottom of the sew pan with slices accompanied by a jump three feet high. until the stew-pot is full. The size of straw cutter and back, took in the genthe put will depend on the number in the cral laugh from the sidewalk without bunily. Pour in sufficient water to cover, giving himself away, and with the digniand figish with crust. Glucose.

Prof. H. W. Wiley, in the Popular Science Monthly, records the amazing progress of the glucose industry. There are twenly immense glueose factories either built or in course of construction. Already a capital of over \$2,000,000 is invested in the lusiness. The daily consumption of corn for the manufacture of glueose is about 35,000 bushels, and the annual amount about 11,000,000. All these factories have sprung up in the last twelve years. They are run day and night, Sundays included, to meet the demand, and still fail to supply it. Notwithstanding these notorious facts, it is almost impossible to find anybody willing to admit that he buys glucose or uses it for any purpose. Its exist-ence is never made known by newspaper advertisements or placards. It is never bottled, boxed or barreled under its own name. It is as carefully screenep rom public view as nitro-glycerine There is no doubt that glucose is largely some one conceited the idea of experimenting with it, and found by the action of hot air and jets of steam under the pressure of three or four atmospheres, blown upon the slag when nearly at a white heat, it became transformed into a light, coherent spongy substance, comething between woul and grey cotton wadding in appearance and capable of being purified so as to become as white as wool. It is, of course, perfectly incombustilde. It is also a had conductor of heat, and relatively cheap; about a cent and a half a pound or about \$5 a cubic yard. It will probably become cheaper as the supply increases. Its uses are many and varied. It makes execllent coverings for forcing heds, wraps for water pipes and fancets to protect from frost. In building it is especially valuable. Placed between the outer and inner surfaces of walls it is a most excellent protection against the cold of winter and the heat of summer; while for the stuffing of partition walls and floors it is the most effective deadener of sound yet discovered. It is lighter and less expensive then most substances used for this purpose, and has the great advantage of being inaccessible to nice as well as preventing the spread of lames in case of tire. It is not waterproof, but is made so when required by coating it under heat with hituminous or resinous matter. The demand for this muterial is increasing, but its mannfacture in this country is controlled by parties who hold patents thereon.-Industrial News.

Geography.

Mr. A. J. Rickoff, of Cleveland, said of geography at the Atlanta meeting: 'What would be the result of an inquiry among the more intelligent tradesmen and members of the profession as to the knowedge of geography which they had attained or accumulated, we will say, at from 35 to 50 years? I do not speak of that alone which they learned in childbood, but of the sum total of all the knowedge they may claim at the time of the inquiry. I think it would be found that they know very little as compared with the 14 or 15 year old miss who has just passed her examination for the high | American people. Kidney-Weil will oure it. selicol in any one of our towns and cities, except us to those points which they have in later years looked up for the purpose of business or pleasure. Not having any relation to the course of reading or business pursuits of matured years, the names and locations of rivers, inountains, lakes, cities, capes, nations, etc., drop from the memory of most men as the features of people who pass in rapid meving procession. The study laiving a rved its purpose in the recitation recen and on examination day is promptly dismissed from the mind. l'est the value of a study thus pursued by any standard you please, and it is valueles, except us to its general out loses, which can be learned in one-third of the time now allotted to it. As studied it contributes ditt'e to our stores of useful information and still less to the their vigorous contortions after decepi-disipline of mind, in a much as it begets tation, and even noiseular quiverings of a habit of enroles indifference to what

Many of our readers will remember an item we published about a year ago in regard to a monster grapevine of the Mission variety growing on the ranch of William E. Flum, several miles from the Cajon. At that time the reporter took his measurement all by guess, and that, town. Not a few thought our description of the big vine a stretch of the reportorial prerogative, yet we have been assured by Mr. Flinn himself that we failed to do the vine even justice; that its branches were longer and covered a much larger area than was represented. Since then this monster has continued to grow until its accumulated weight of branches and fruit has brought total destruction to one of the two large oak trees which supported it and almost demolished the domicile of its owner. From Mr. Flinu's driver we learn that the vine and its fruits have completely crushed the tree, tearing it out by the roots. The size of the vine and the weight of grapes growing upon it may be estimated when we say that the oak tree thus prostrated, which is perfectly sound, is fully two and a half feet in diameter and upwards of sixty feet in heighl, with corresponding spread of limbs and branches. Mr. Flinn estimates that on that portion of the vine which destroyed the tree there were fully five tons of grapes.—San Diego, (Cal.) Union.

In April Last. twenty-four members of Arlington's minstrels were taking Warner's Safe Kidney and Liver Cure. It made them happy.

Apostrophe to a Comet.

Here is Edward Everett's beautiful apestrophe to Donati's comet, published

to the depites of the beavens, never again to be seen by the eyes of men now livug! Thou hast run thy race with glory millions of eyes have gazed on thee with wonder, but they shall never look upon three again. Since thy last appearance in these lower skies, empires, languages, und races of men have passed away; the Mecedonian, the Alexandrian, the Augustau, the Parthim, the Byzontine, the Saracenic, the Ottoman dynasties sunk or are sinking into the gulf of ages. Since thy last appearance old continents have relapsed into ignorance and new worlds have come out from behind the veil of waters. The Magian fires are quenched in the hill-tops of Asia; the Chaldeau scer is blind; the Egyptian hierogrammist has lost his enuning; the oracles are dumb. Wisdom now dwells in furtherest Thule, or in newly discovered worlds beyond the sea. Haply when, wheeling up again from the celestial abyes thou art once more seen by the dwellers upon the carth, the languages we speak shall be forgotten and science shall have fled to the uttermost corner of the earth. But even there His hand that marks ont thy wondrous eirenit, shall still guide thy course; and then anon, Hesper will smile ut thy approach and Arcturus, with his suns, rejoice at thy coming."

Miss Posicism says she should love to be a soldier—they have so many engagements. She should remember that where there are so many engagements a fellow has to be on guard.

Humbugged again. I saw so much said about the merits of Hop Bitters, and my wife who was always doctoring, and never well, teased me so organily to get her some, I concluded to be humbinged again; and I am glad I did, for in less than two months' use of the Bitters my wife was cured and she has remained so for eighteen months since. I like such humbugging.—H. T., St. Paul.—Pio· He Had Plenty.

Some years ago, when the country was newer than now, and the then rising population not so polished and polite as is at present the case, a Methodist camp meeting was held south of Newburg. As was the custom, the visiting ministers who were too delicate to stand life in the tents were quartered on the local brethren. Willium Robinson, Esq., who relates the ineident, was one of the preachers, and was assigned to Brother Johnson's house, where two of the preachers were entertained. The youthnl scion of the house of Johnson was a half-licked, uninteresting cub, and his mother was very anxious lest he should do discredit to her training, and accordiugly gave the youngster daily instrucdemean himself. As intimated previously, the earlier residents of Cuyahoga County were not remarkable for their for a flurse flur pliemy and moral converse was not closely drawn. At dinner the boy remained silent and devoted his energies and talents strictly to justing all the food within his reach where it would do the most good. Noticing a sort of cessation of hostilities, a sort of letting up, so to speak, in the gastronomic feats of her first and only born, the mother heamingly remarked:

'Have some more beaus, Willie? "Not another g - d - bean, mother!" responded the cub.

"That's right, Willie; speak right out, and don't forget to be polite," and Mrs. Johnson beamed with material satisfaction and self-gratulation, ulterly unconscious of the hourified looks which her clercial guests exchanged. — Cleveand Leader.

A Whale Parent's Devoilon. Sperm whales usually travel in schools, and, in going into a body composed of "cows and calves," the latter. although yielding but a small amount of oil, are "struck" first. By this method both are cuptured. The mother will not leave her offspring, neither will it strack the boat; but will remain close to the calf, apparently urging it to escape by sounding or by llight. The "little one" can only remain a short time under water, consequently its dame is almost constantly a target for lances, which she will continue to receive, although not being fast to the boot, until life is extinct, when the calf will be killed. She will sacrifice her own life in the attempt to assist her young, and to any one, except a whaler, it would appear like a cold-blooded and heartless murder. Even they cannot help admiring the devotion, and will endeavor to make the struggle as brief as possible. The "calf" exhibits no such tilial affection, for, if the mother is harpooned first, he will immediately lake French leave, leaving the "dd lady" to tight her own battles. Extreme caution is used when striking a ealf to avoid a mortal wound, as his death is sure to be followed by the flight of the cow, who knows it instantly.
